## STRATEGY STATEMENT

The school recognises that children have been affected by the pandemic in many different ways and the impact varies depending on their experiences, starting points and a range of other factors. We feel that the term 'catch-up' is not appropriate – it is not possible to cram in everything they may have lost and get them to where they would have been had the pandemic not happened. Instead, our strategy is to re-assess their needs and current situation and make adjustments to what we provide, including additional help where required, in order to prepare them as fully as possible for next year. This strategy includes:

- Maintaining a broad and rich curriculum, adjusting it to focus on key priorities to maximise readiness for next year. This has involved additional training and resources
- 1:1 and group interventions including speech and language, phonics, emotional literacy, social interaction and communication, maths and English key skills
- Providing increased specialist learning support including EAL, SEND, emotional literacy and therapeutic support.
- To narrow gaps created by disadvantage or negative lockdown experiences by providing targeted support and intervention including behaviour support, family support and additional 1:1 learning support.
